

VHD Guide

- The IODD Mini can use VHD files to use the Virtual Drive (HDD) and Virtual USB Memory Stick (RMD)
- Download the [VHD Tool]
ftp://iodd.kr/open/vhd_tools/

VHD file create

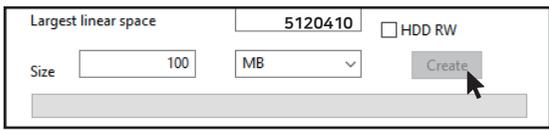

- Select the [Create] tab of the VHD Tool.

- Specify the location and file name of the mini in [File name].

- Enter the size of the VHD file to be created in [Size].
!!! Must be smaller than or equal to the size of [Biggest linear Space].

- Click the [Create] to create the VHD file in the selected path.

VHD file mount

- Press the key to mount the VHD file.
The created VHD file is recognized as 'uninitialized drive'

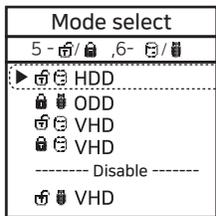

VHD file usage and precautions

- VHD files can use various settings.
- You can change the properties of the VHD file at any time with the [Mode Manager] menu.

Never delete a VHD file that is in use (mounted) or change its file location, as this may cause a fatal error in the SSD. and Unschedule the disk defragmentation of iodd mini

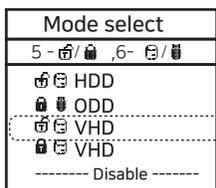

Fixed / removable change

Press the button and select the [MODE Select] item.

Button 6 on the selected device (▶).
The device can be changed to removable or fixed.
Removable: Recognized as removable disk by the host
Fixed: Recognized as external HDD
 Fixed Removable

Write Protection On/Off

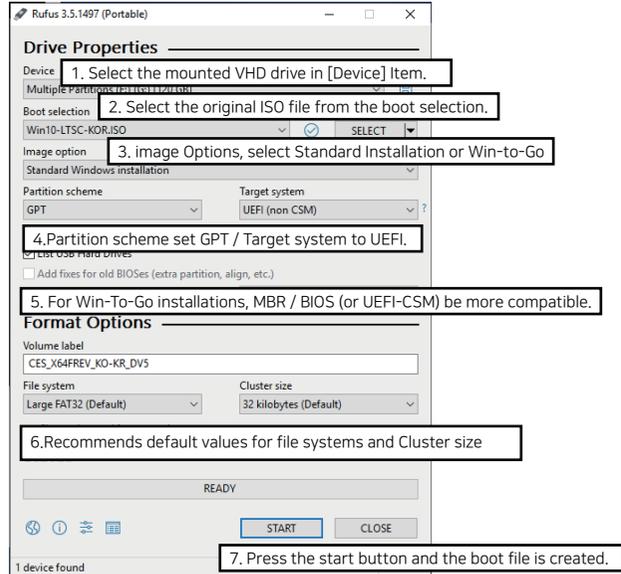

In the selected device (▶), use button 5 to set the device to write protection On/Off
This option can be checked by the lock status.
 On OFF

Bootable VHD Creat

- The RUFUS * utility can be used to create UEFI bootable VHD files or Windows-to-go disks.
- You can boot Only support UEFI system
- The VHD file must be set as the [removable] disk

RUFUS Download and Run

- Download Site(Official)
<https://rufus.ie/>
- After installation, run as administrator

Bootcamp for MAC OSX

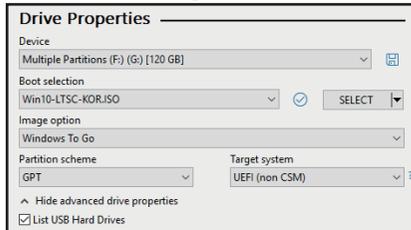

- The WTG and encryption features of the IODD MINI make it possible to boot securely even on MACS.

Preparations

- External USB or VHD file for boot camp driver
-Download the driver from the boot camp control panel.
- VHD file for boot camp installation (fixed recommended)

RUFUS Setting

- The default settings are the same as for UEFI boot.

Select [USB Hard Drive List] in [Advanced Drive Properties].
Select the target VHD drive (fixed) to install on the device.
Set the partition type to [GPT] and the target system to [UEFI].

After work

- With your Mac turned off, connect the Ipod Mini and press the power button while holding down the [option] key to select a boot disk. **Choose the yellow UEFI disk** [Press and hold the Control key when first installing]
- Install the bootcamp support driver.
